Backend Engineer specializing in AI Agent Systems | Production LangGraph, CrewAI, OpenAI Agents SDK | Remote-first

TECHNICAL SKILLS

AI/Agentic Systems: LangGraph, CrewAI, OpenAI Agents SDK, PydanticAI, LangChain, RAG, LLMs, GenAI
Backend & Languages: Python, JavaScript, C++, FastAPI, Node.js, Flask, WebSockets, REST APIs, Microservices
Databases: PostgreSQL, MongoDB, Redis, Weaviate, MySQL
DevOps & Cloud: Docker, Kubernetes, CI/CD, Kafka, Prometheus, Grafana, AWS, Azure

EXPERIENCE

TheAgentic

Sept 2025 – Present

Backend Engineer

Remote

- Architected multi-agent backend orchestrating 50+ enterprise automation workflows with sub-second latency using LangGraph and FastAPI.
- Built crypto risk analysis agent classifying tokens across 50+ multi-source signals, processing 1000+ tokens for real-time rug-pull detection.
- Developed embedding-based job-matching engine with 92% relevance accuracy, serving 5K+ candidate-job matches via vector similarity search.

Qlaws.ai – Legal Solution

June 2025 – Sept 2025

Backend Engineer

Remote

- Refactored summarization pipeline with LangGraph orchestration, reducing processing time by 60% and migrating 100K+ vectors to Weaviate.
- Built multi-agent legal drafting system automating LOI-to-SPA conversion using 6 specialized agents for extraction, validation, and interaction.
- Designed dual-architecture chatbot (Redis + PostgreSQL) handling 500+ concurrent legal document queries with sub-200ms response times.

Dream Skrin – Supply Chain Intelligence

Feb 2025 – June 2025

Backend Engineer

Remote

- Designed distributed Central Intelligence Layer unifying procurement, inventory, and logistics operations across the supply chain.
- Built real-time demand forecasting with XGBoost and automated reordering, reducing stockout incidents by 25%.
- Orchestrated workflows using Temporal across 5+ services; optimized vendor routing with OR-Tools, reducing delivery delays by 30%.

MINTRIX – AI-Based Learning

June 2024 – April 2025

Backend Engineer

Remote

- Built RAG-powered chatbot with LangChain + Weaviate serving 2K+ students, achieving 85% query resolution without human intervention.
- Designed CRM pipeline tracking 10K+ daily interactions; optimized API response times by 45% through caching and query optimization.

PROJECTS

DirectMesh – AI-Powered D2C Platform | Python, FastAPI, AI Agents, PostgreSQL

- Built omnichannel AI agent system handling customer interactions across WhatsApp, Email, SMS, and Web Chat simultaneously.
- Designed RFM segmentation engine and analytics pipeline processing 50K+ customer events for real-time business intelligence.

GeoPulse – Real-Time Location Tracking | Python, FastAPI, WebSockets, Redis, PostgreSQL

- Built real-time tracking backend processing 10K+ positional updates/min with WebSocket streaming at sub-100ms latency.
- Designed scalable APIs with Redis caching, reducing query response time by 70% for movement data replay and monitoring.

MarketMinds – Stock Analysis Agents | LangChain, OpenAI, CrewAI

- Developed 3-agent pipeline (researcher, analyst, reporter) for automated stock analysis; achieved 85% accuracy over 6-month backtesting.

EDUCATION

Symbiosis Institute of Technology, Pune

B.Tech in Computer Science & Engineering
